Timeline

Projekti

FluidSim	Fluid simulation based on solving Navier-Stokes
	equations
Height3D	OOP framework made in $C++$ for making 3D apps
	using OpenGL.
${\sf PageProc}$	Document layout analysis. Uses xy-cuts algorithm
	and various heuristics to classify elements on page.
Osmium	An attempt to make open source version of Wol-
	fram language with compatible API.
DistTranscode	Distributed FFmpeg (video decoding/encoding
DistTranscode	Distributed FFmpeg (video decoding/encoding and filtering).
DistTranscode CoNAL	
	and filtering).
	and filtering). Computing Node Abstraction Layer: framework
CoNAL	and filtering). Computing Node Abstraction Layer: framework for building distributed applications
CoNAL	and filtering). Computing Node Abstraction Layer: framework for building distributed applications Platform for making and deploying cloud-based ap-
